Soundtex

SOUNDTEX

Acoustical, decorative, insulating ceiling and wall coating.

DESCRIPTION:

SOUNDTEX is a low odor, VOC compliant, alkali-resistant coating to be used as a seamless decorative substitute for acoustical tiles or wall panels. **SOUNDTEX** is an easily applied one component material that incorporates acoustical and insulating materials into a self contained formulation. Available in regular texture or heavy texture,

SOUNDTEX may be applied on concrete, masonry, plaster, cement board, or masonite.

ADVANTAGES:

- ? Seamless surface
- ? Less expensive than most acoustical tiles or plaster
- ? Heavy texture will hide most surface imperfections
- ? Provides up to 30% increase in sound absorption coefficient over standard painted drywall
- ? **SOUNDTEX** surfaces provide a ?cushion? of insulating material, minimizes heat and cold transmissions
