## Permacrete 10-22

### PERMACRETE 10-22

Epoxy, heavy duty patching, resurfacing, and grouting compound.

### DESCRIPTION:

**PERMACRETE 10-22** is a thermosetting, low odor, high impact, chemical and abrasion resistant epoxy aggregate system supplied in pie-measured, 3 component units containing resin, hardener and grey aggregate. It is easily applied to concrete and most building surfaces. **PERMACRETE 10-22** is chemical resistant and stands up to heavy industrial use. **PERMACRETE 10-22** works well filling potholes in concrete, crack filling, divot repair or as an all purpose patching compound.
