Concure WB

CONCURE WB
Low odor, VOC compliant water based curing compound which also chemically hardens.

DESCRIPTION:
CONCURE WB is a silicate solution which will render the surface hard, allowing the concrete to chemically cure, and provide a non-dusting surface with bondability.

ADVANTAGES:
? CONCURE WB competes with resins and waxes, but provides bondability without sandblasting.
? Will not discolor, concrete retains its esthetic value.
? No surface residue left after seven days.
? Leaves surface bondable for paints, adhesives, asphalt, coatings, resilient to bonded wood flooring, terrazzo, dementitious toppings, stucco, and gunite without sandblasting.
? Recommended for curing roof slabs perpartitory to application of roofing neoprenehypal on sheating, and polyurethane.
? May be used for both interior and exterior, horizontal, or vertical surfaces.
? No waxes, paraffins, or varnishes added.
? Provides ease of handling and application.
? Sprayers will not clog, no damage to parts.
? Equipment can be cleaned with water.
? Non-flammable
? Non-toxic and non-acid, no harmful fumes or odors.
? May be recoated at any time.
? Cost is only a fraction of a penny per square foot.
? Available with or without a fugitive dye.
